

Frontend Development with React.js

Project Documentation format

1. Introduction

- **Project Title:** Navigate the news landscape
- **Team leader:** E. Preethi -12492cs22@princescience.in
- **Team Members:** A. Srividhya -12475cs22@princescience.in
- A. Malini -11906cs22@princescience.in
- S. Vijayalakshmi -12442cs22@princescience.in
- A. Swathi -12525cs22@princescience.in

2. Project Overview

- **Purpose:** Briefly describe the purpose and goals of the project.
- **Features:** Highlight the key features and functionalities of the frontend.

3. Architecture

- **Component Structure:** Outline the structure of major React components and how they interact.
- **State Management:** Describe the state management approach used (e.g., Context API, Redux).
- **Routing:** Explain the routing structure if using react-router or another routing library.

4. Setup Instructions

- **Prerequisites:** List software dependencies (e.g., Node.js).
- **Installation:** Provide a step-by-step guide to clone the repository, install dependencies, and configure environment variables.

5. Folder Structure

- **Client:** Describe the organization of the React application, including folders like components, pages, assets, etc.
- **Utilities:** Explain any helper functions, utility classes, or custom hooks used in the project.

6. Running the Application

- Provide commands to start the frontend server locally.
Frontend: npm start in the client directory.

7. Component Documentation

- **Key Components:** Document major components, their purpose, and any props they receive.
- **Reusable Components:** Detail any reusable components and their configurations.

8. State Management

- **Global State:** Describe global state management and how state flows across the application.
- **Local State:** Explain the handling of local states within components.

9. User Interface

- Provide screenshots or GIFs showcasing different UI features, such as pages, forms, or interactions.

10. Styling

- **CSS Frameworks/Libraries:** Describe any CSS frameworks, libraries, or pre-processors (e.g., Sass, Styled-Components) used.
- **Theming:** Explain if theming or custom design systems are implemented.

11. Testing

- **Testing Strategy:** Describe the testing approach for components, including unit, integration, and end-to-end testing (e.g., using Jest, React Testing Library).
- **Code Coverage:** Explain any tools or techniques used for ensuring adequate test coverage.

12. Screenshots or Demo

- Provide screenshots or a link to a demo showcasing the application's features and design.

13. Known Issues

- Document any known bugs or issues that users or developers should be aware of.

14. Future Enhancements

- Outline potential future features or improvements, such as new components, animations, or enhanced styling.
